Project Description:

Please set out as clearly as possible your project's aims and how the grant you have applied for will benefit residents of the parish council area – continue on a separate sheet if necessary.

To encourage residents to 'walk Stapeley'

To encourage residents to start and continue exploring the rural and semi-urban parish by publishing tested graded walking routes of varying length and difficulty.

To give confidence to residents and visitors to walk and appreciate the parish council area and surrounding areas.

Benefits are:

Improvement of residents' physical health by increasing the amount of exercise undertaken

Improvement in residents' emotional health and wellbeing by spending more time outdoors, in green spaces and interacting with the environment.

Residents will feel more connected to their community by walking in it and thus more aware of the resources and issues within it.

A secondary benefit of increasing walking in Stapeley would be the replacement of short journeys made by car, thus reducing both road accidents and air pollution.
